

## Business Mathematics (BK/IBA) – Quantitative Research Methods I (EBE)

### Extra tutorial 4 – Applications

#### Instructions

The questions below are taken from Sydsæter & Hammond, 4/E. There are many questions, many more than can be discussed at the extra tutorials. So prepare well, and figure out which questions should be discussed and which not. Doing mathematics is the best preparation for the written exam, so we recommend you to do all exercises, and to do so before the tutorial classes.
